

Trust. Transparency. Transformation.

- 8.00 am** **Registration opens**
Exhibition & catering available
- 9.00 am** **Welcome & introduction**
Mark Wilson, Energy Operations Director, Offshore Energies UK
- 9.10 am** **Opening address**
David Whitehouse, Chief Executive, Offshore Energies UK
- 9.20 am** **Keynote address - To be announced soon**
- 9.35 am** **North Sea Future Plan in action: cross-sector collaboration to provide colocation for a safer, cleaner basin**

As the North Sea continues to evolve into a multi-purpose energy basin, a direction articulated in the North Sea Future Plan, colocation between offshore wind, oil and gas, and CCUS is increasingly central to the UK's energy transition. This session explores the operational, safety, environmental and regulatory challenges that arise when sectors overlap, alongside the practical solutions emerging from real projects and cross-industry collaboration.

We will unpack key HSE considerations including aviation constraints, safety zones, environmental interactions, and simultaneous operations. Panellists will also highlight opportunities for shared access, coordinated planning, and more efficient use of existing assets, all critical to delivering the integrated approach envisioned in the North Sea Future Plan.

Join us to understand how improved guidance, aligned standards, better data sharing, and early engagement can enable safe and sustainable colocation across the North Sea.

Facilitated by Professor John Underhill, University Director for Energy Transition, University of Aberdeen

- Adrian Topham, Senior Development Manager CCUS, The Crown Estate
- Jennifer Godwin, CEO, Seabed User & Developer Group
- Harbour Energy
- CNOOC
- TotalEnergies

- 10.10 am** **Refreshments break & exhibition visit**

- 10.45 am** **Parallel session 1**
Delegates to self-select which conference stream they wish to attend.

Breakout 1 – HEALTH

Trust, transparency and transformation in supporting good mental health.

Discover how building psychological trust within teams can be a game-changer for mental well-being, especially offshore. Hear from a leading expert with hands-on experience in mental health support, who will share insights on the development and progress of the IADC Mental Health Charter. Learn about the vital resources, training, and practical strategies available to help individuals in crisis, and explore innovative approaches to fostering healthy, resilient teams. Don't miss this essential session for anyone committed to advancing mental health in the workplace.

David Jamieson, Founder, Salus
- 10.55 am** **Step Change in Safety site visit refresh**
Peter Hepburn, Operations Director, Spirit Energy
- 11.10 am** **Marine safety risk management and assurance**
Michael Cowlam, Managing Director, Seacroft Marine Consultants Limited
- 11.25 am** **Using crew resource management to enhance operational excellence**
Chris Stirling, Managing Director, Enhancing Excellence
- 11.40 am** **Panel session**
- 12.00 pm** **Session close**

Breakout 1 – ENVIRONMENT Measuring methane

Sponsored by

With UK industry delivering significant reductions on methane emissions, and the EU methane regulation introducing MRV for imported gas fast approaching, this is a critical session for those thinking about conducting site level surveys (OGMP 2.0 level 5). Hear from the chair of the OEUK group who developed the guideline, learn more about the challenge of reconciling bottom up and top-down data, and how to conduct useful and relevant aerial methane measurement campaigns.

NEMS

Chaired by Christer Bjorno-Husa, Sales & Marketing Director, NEMS AS

- 10.45 am** **Introduction & scene setter**

1.00 pm **Post-lunch energiser**

1.30 pm **Parallel session 2**
Delegates to self-select which conference stream they wish to attend.

Breakout 2 – HEALTH Trust, transparency and transformation in health compliance

Step into a dynamic session where leading regulators and technical experts reveal the latest health trends and regulatory actions shaping offshore operations. Gain unique insights into the HSE's impactful asbestos campaign and discover best practices in asbestos management and its health implications from an experienced occupational health specialist. Delve into cutting-edge strategies for legionella management, including sampling, testing, monitoring, and outbreak prevention, guided by an experienced technical manager. Whether you're an industry professional or a newcomer, this session promises invaluable knowledge, practical tools, and inspiring stories to help you champion health compliance and protect your team offshore. Don't miss this opportunity to elevate your expertise and make a tangible difference.

1.35 pm **Introduction & scene setter**

1.40 pm **Regulatory findings**
Neil Grace, Principal Inspector, Health & Safety Executive

1.55 pm **Asbestos**
Simon Walker, Occupational Health & Industrial Hygiene Manager, Altrad Integrity Services

2.05 pm **Asbestos**
Donnie Munro, HSE Lead, Spirit Energy

2.15 pm **Legionella**
Julie Hart, Health & Hygiene Technical Manager, Intertek

2.30 pm **Panel session**

2.45 pm **Session close**

Breakout 2 – SAFETY Transformational safety practice

This forward-looking session explores emerging issues and innovative practices that help organisations maintain and enhance safety performance in a complex operational landscape. It will showcase creative approaches, the effective use of technologies, and practical frameworks designed to deliver safer operations.

Breakout 2 – ENVIRONMENT

Operating in marine protected areas: Aligning operator, regulator and advisory roles

This session explores the challenges and opportunities of operating within a MPA, from multiple perspectives. The operator will outline the activities undertaken to support permitting requirements, and the regulatory and advisory hurdles encountered and how they were addressed. This will be followed by insights from OPRED and JNCC on their respective roles and requirements. A leading academic will offer an independent view on how these three perspectives intersect, helping to identify opportunities for clearer collaboration and improved environmental outcomes.
